ALABAMA

Farmers and Consumers' Bulletin

Volume 68, Issue 5

May 2020

ALABAMA DEPARTMENT OF
AGRICULTURE & INDUSTRIES

1445 Federal Drive • Montgomery, Alabama 36107-1125

From the Desk of Rick Pate, Commissioner

Amid the coronavirus outbreak, our department is working diligently to address challenges facing both farmers and consumers. We remain in contact with USDA Secretary Sonny Perdue, Governor Kay Ivey, agricultural stakeholders, and numerous national, state and local officials.

I am encouraged by the announcement made on April 17 by USDA about the Coronavirus Food Assistance Program (CFAP). This \$19 billion multifaceted relief program will provide critical support to our farmers, maintain the integrity of our food supply chain, and ensure every American continues to have access to the food they need.

The CFAP includes two major elements:

1) **Direct Support to Farmers and Ranchers:** The program provides \$16 billion in direct support based on actual losses for agricultural producers where prices and market supply chains have been impacted. To qualify for a payment, a commodity must have declined in price by at least 5% between January and April.

2) **USDA Purchase and Distribution:** USDA will partner with regional and local distributors to purchase \$3 billion in fresh produce, dairy, and meat. The distributors and wholesalers will then provide a pre-approved box of fresh produce, dairy, and meat products to food banks, community and faith-based organizations, and other non-profits serving those in need.

Details regarding eligibility, rates, and implementation of the CFAP will be released at a later time.

USDA Secretary Sonny Perdue meets with farmers throughout the year. Photo courtesy of USDA.gov.

I want to assure you that our food supply chain is safe, abundant and sustainable. And with continued cooperation among farmers, government and agricultural stakeholders we will get through this. I hope these difficult times pass us soon and that your family, farms and friends stay healthy.

Sweet Grown Alabama Launches Consumer Focused Marketing Campaign

Sweet Grown Alabama, a non-profit agricultural branding program that works in cooperation with the Department of Agriculture, is launching a consumer-focused marketing campaign beginning May 1.

"Since Sweet Grown Alabama began in fall 2019, we have been focused on recruiting excellent farmer members to join our program," said Director Ellie Watson. "Now that we have a strong base of over 100 members and seven founding member partners, we are ready to move into the second phase of the initiative- encouraging consumers to begin looking for our logo on local products."

The initial consumer awareness push will include billboards, digital advertising and a consumer kickoff event. At the time of this writing, a **Farmers Market Kickoff Event is scheduled for May 20** near the Capitol Building in Montgomery. Sweet Grown Alabama member farmers are invited to sell their locally grown items to consumers and share the importance of buying local. Governor Kay Ivey, Commissioner Rick Pate and other Sweet Grown Alabama leaders will deliver remarks and mingle with farmers, shoppers and the media.

Billboards promoting Sweet Grown Alabama crops will be displayed in 17 locations across the state, with a combined estimated weekly impression of over 2.5 million views. This initial outdoor advertising campaign will run from May-July.

"Our goal with the Sweet Grown Alabama billboards is to raise consumer awareness of the program and build brand recognition for the logo," said Watson. "We want Alabamians to seek out and purchase in-season, high-quality, locally grown goods."

To help consumers locate **Sweet Grown Alabama** farms and products, an online database will be launched this month. Consumers can visit www.SweetGrownAlabama.org to search for local products in their area. Follow Sweet Grown Alabama on **Facebook** for the latest updates on the website database, new program members and the Farmers Market Kickoff Event.

Employee Spotlight

We continue to spotlight an employee each month to put a face with the many services provided by the Department of Agriculture and Industries. We hope you enjoy getting to know more about our excellent employees!

Our Spotlight Employee of the Month for May is

Penny Reynolds

Our Spotlight Employee of the Month is Penny Reynolds. She has worked for the Department of Agriculture and Industries for over twenty years and serves as a supervisor for the Shipping Point office in Samson, AL.

Daily Reynolds oversees grading conducted on shelled stock peanuts for Olam Peanut Shelling Company. Peanuts are graded to establish the quality and value of the product. All domestic and imported peanuts are inspected in accordance with

USDA grade standards and minimum quality standards. Inspections are required on all peanuts before entering the edible market.

The busiest time of year for Reynolds is during peanut harvest which is typically from late August through November. Locally harvested farmers' stock peanuts must be sampled and inspected to determine the percentage of quality factors. After being graded, each load of peanuts has an official inspection certificate with the quality determination.

Reynolds truly enjoys the people she works with and appreciates how everyone works together as a team. She and her husband, Randy, have been married over 30 years. They have two grown sons, Josh and Clay, and one granddaughter, Emma.

COVID-19 HAVE YOU FEELING SHUT-IN?

Check out the Farmers Markets Guidelines & U-pick Locations pg 6 ... support your local farmers while you practice social distancing and get some fresh air and home-grown products!

Alabama Livestock Summary

Cattle & calves at reported markets throughout the state for April totaled an estimated 22,000 head compared to 36,151 head for March and 49,974 head for April 2019. Compared to last period: Slaughter cows and bulls sold \$5-\$10 lower. Feeder steers and heifers sold mostly \$5-\$15 lower, and feeder heifers sold \$2-\$4 lower. Replacement cows sold mostly steady. The feeder supply included 9% steers, 44% heifers, and 47% bulls.

This **Mediterranean Pasta Salad** recipe is filled with fresh veggies and pantry items. Top it with a homemade Greek dressing.

MEDITERRANEAN PASTA SALAD

INGREDIENTS:

- 8 oz rotini pasta
- 1 cup tomatoes, chopped OR
- 1/4 cup oil-packed, sundried tomatoes, drained
- 1 whole medium cucumber, halved and sliced
- 1/2 cup kalamata olives or black olives
- 1 cup chickpeas, drained and rinsed
- 1/4 cup red onion, diced
- 1/2 cup feta cheese, crumbled
- 1 medium jar marinated artichokes quarters, drained
- 1 Tbsp fresh parsley, rough chop

DRESSING:

- 3 Tbsp red wine vinegar
- 1/3 cup light olive oil
- 1 Tbsp lemon juice
- 1 tsp honey
- 1 tsp Dijon mustard
- 1/2 tsp oregano
- 1/4 tsp garlic powder
- Salt & pepper to taste

METHOD:

1. Cook pasta al dente according to package directions. Run under cold water to stop cooking. Chill.
2. Combine dressing ingredients in a jar with a tight-fitting lid & shake well to combine.
3. Place all salad ingredients in large bowl. Top with dressing & mix well.
4. Refrigerate at least 1 hour before serving.
5. Garnish with extra feta cheese & parsley if desired.

Notes: Scrub the cucumber well to remove waxy coating. I do not like to peel a cucumber but before I cut it I to run the tines of a fork down the cucumber to score the skin. A garden pasta variety will give the salad some color but will not impart much flavor. Do not be cheap with the feta cheese. It should be white with a tangy flavor and rich aroma. It should not taste bitter, sour, chalky or tasteless. I like to buy feta in a block and crumble what I need. Also, this recipe calls for a cup of chopped tomatoes. Sun-dried tomatoes can be substituted but do not use a whole cup as the recipe calls for. Thinly slice the sun-dried tomatoes in strips and add a third cup of a cup at the most, a quarter cup will do.

National Weekly Hog Report

The following are the national statistics of hog sales, as compiled by the USDA on Friday, April 17. Early weaned pigs are \$2 per head lower. All feeder pigs are \$13 per head lower compared to last week. Demand light to moderate for moderate offerings to heavy offerings. Receipts include 32% formulated prices. All prices quoted on per head basis with an estimated lean value of 50-54 percent.

Receipts this Week: 119,827 Last Week: 91,622 Last Year: 112,810

Information below (l-r) is: Lot Size, Head, Formula Range, Formula Wtd Avg., Head, Cash Range and Cash Wtd Avg.

Early Weaned Pigs 10-12 Pounds Basis:

600 or less				1,480	1.50-5.00	2.85
600 - 1,200				6,125	1.00-7.00	3.30
1,200 or more	38,177	19.94-40.50	30.02	72,880	1.00-11.50	5.84
Total Composite	38,177	19.94-40.50	30.02	80,485	1.00-11.50	5.60

Feeder Pigs 40 Pounds Basis:

600 or less				1,165	14.50-27.00	20.17
Total Composite				1,165	14.50-27.00	20.17

Total Composite Weighted Average Receipts and Price (Formula and Cash): All Early Weaned Pigs: 118,662 at 13.45; All 40 lbs. Feeder Pigs: 1,165 at 20.17.

NOTE: Prices are quoted on a per head basis delivered to the buyers farm. Prices include freight and fees on a farm to farm basis.

If You Have Animals ... Coronavirus Advice from the USDA

Photo courtesy of USDA.gov

- Coronaviruses are a large family of viruses. Some cause illness in people, and others cause illness in certain types of animals.
- Some coronaviruses that infect animals can sometimes be spread to people, but this is rare.
- We do not know the exact source of the current outbreak of coronavirus disease 2019 (COVID-19). The first infections were thought to be linked to a live animal market, but the virus is now primarily spreading from person to person.
- The first case of an animal testing positive for the virus in the United States was a tiger that had a respiratory illness at a zoo in New York City.
- We do not have evidence that companion animals, including pets, can spread the virus that causes COVID-19 to people or that they might be a source of infection in the United States.
- CDC is aware of a very small number of pets outside the United States reported to be infected with the virus that causes COVID-19 after close contact with people with COVID-19.
- Treat pets as you would other human family members – do not let pets interact with people or animals outside the household. If a person inside the household becomes sick, isolate that person from everyone else, including pets.
- Further studies are needed to understand if and how different animals could be affected by the virus that causes COVID-19 as well as how this might affect human health.
- This is a rapidly evolving situation and information will be updated as it becomes available.

For more information, visit: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html#COVID-19-and-Animals>.

Plant 2020 Considerations for Alabama Producers

These are unprecedented times. Large companies are closing doors and sending their employees home to work. Small businesses are shipping inventory out of home garages. Despite the myriad of hardships faced as a result of COVID-19, the world keeps turning. While demand for agricultural products remains high, farmers on every scale are working to balance the rush of spring planting with healthy workers and work environments.

Alabama Cooperative Extension System economist Max Runge said the effects of COVID-19 have cast a bleak shadow on the row crops outlook for the 2020 season. The commodity price outlook for Alabama crops has variable costs being at or below cost of production. Producers will need to prioritize and analyze their inputs and management practices closer than ever before.

Prospective Plantings

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) released the regional and national prospective plantings numbers on March 31. This survey is based primarily on surveys taken the first two weeks of March. These numbers are always subject to change as the year—and growing season—progress. However, 2020 may see larger than typical differences in the prospective acres planted and actual acres planted.

Acreage numbers for corn and soybeans are up across the country, as cotton acreage hangs steady at 13.7 million acres—down less than one percent from 2019. The wheat planted area is forecasted at 44.7 million acres, down one percent from 2019. This wheat acreage represents the lowest planted area on record since 1919.

In Alabama, corn, peanuts and winter wheat are on track to exceed the planted acreage recorded in 2019. With an estimated 370,000 acres, corn is up 16 percent from 2019. If these numbers hold true, this will be the most corn acreage recorded in Alabama since 1985. Estimated acres of peanuts are up three percent from 2019 at 165,000 acres. Winter wheat acreage is also on the rise as producers intend to plant 150,000 acres—up 15 percent from 2019.

While cotton and soybean acreage in the state is expected to be lower, the numbers are still relatively close to acreage planted in 2019. Producers intend to plant 260,000 acres of soybeans, only a two percent decrease. Cotton intentions are also down two percent. However, those numbers still stand around 530,000 acres.

Producer Considerations

As Alabama farmers move forward into the planting season, Runge said producers, their families and employees' health and wellbeing should be the farm's first and foremost concern. He also said another important aspect is to set a yield goal for each crop and by field if possible.

"Setting a yield goal is more than just picking a number," Runge said. "What will it take for your farm to achieve this goal and is it profitable?"

Other considerations include:

- **Variety selection.** With the expectations of low commodity prices, what traits can you afford? How does this relate to the yield goal?
- **Soil testing.** Having an understanding of a field's fertility level provides a look at ways to meet a yield goal. If nutrient levels are adequate, reducing fertilizer may help reduce costs.
- **Planter and sprayer calibration.** Seed and chemicals are expensive. Take care not to apply too little, too much or inconsistently.
- **Scouting and timeliness.** Scout early and often. The most economical time to control weeds is when the plants are small.
- **Pest thresholds.** Know the economic thresholds of insects and diseases.
- **Communication with neighboring farmers.** Keep in contact with other producers regarding any pests and plant diseases they may observe so your team can watch for those as well.
- **Calculate and understand the cost of crop inputs.** If a pest needs control applications, what will it cost and what is the benefit?
- **Plan and prioritize.** While it simply isn't feasible to account for all situations or issues, what are some of the common issues faced on-farm, such as too much or too little rain?

More Information

Read more about the NASS survey findings by visiting the USDA online. More recommendations, including row crop and horticulture budgets, are available on the Alabama Extension Farm Management page. For more information, contact a member of the Farm and Agribusiness Management team.

COVID-19 Alabama Farmers Market REVISED Guidelines

Market Customer Best Practices During Covid-19 Outbreak:

We encourage everyone who is healthy and feels safe to visit farmers markets in order to procure healthy, local food from area farmers, ranchers and small businesses. But we ask that you follow these strict guidelines:

- Please be patient and follow new market rules during this time.
- Wash your hands for 20 seconds upon arrival at the market and frequently as you move throughout the space. Most vendors will have hand sanitizer at their booth.
- Do not congregate between booths or in walkways.
- Maintain at least an arm's length distance between other shoppers and vendors, especially while waiting in line.
- Do NOT greet anyone at the market with hugs or handshakes.
- Avoid touching your face.
- No hand-to-hand contact will be allowed between vendors and shoppers. Point to the product that you would like, allow the vendor to bag it and set it down on the table before you pick it up.
- Do not hand vendors payments directly. Place cash and credit cards on the table for vendors to pick up. If you are able, we encourage you to set up Apple Pay or Venmo on your smartphone before you arrive and use this as a payment method. If you do use this method of payment, please sanitize your phone before you arrive and after you leave the market.
- Anyone who is feeling unwell in any way should stay home.
- Any shopper who is at a higher risk, including individuals who are over 65 and/or with underlying health conditions, should stay home.
- Please refrain from bringing your pets to the market during this time.
- **Please refer to these guidelines if utilizing *U-Pick Operations*, which many farms are still allowing versus bringing products to a marketplace. Some farms will pre-pick and package the products and arrange a time for consumer to pick up throughout the day.**

No dogs are allowed at the farmers' market unless they are service dogs as defined as follows: Under the ADA, a service animal is defined as a dog that has been individually trained to do work or perform tasks for an individual with a disability. The task(s) performed by the dog must be directly related to the person's disability. (emotional support dogs do not qualify).

Consumer Confidence in Local Products:

While it is important to establish guidelines that will strive to keep markets a safe place for our farmers and customers, it is equally important to ease customer concerns and help them feel comfortable coming to a farmers market amid the coronavirus outbreak. Use social media to promote the efforts you are taking to ensure consumer safety. In addition to sharing the sanitation practices you are implementing, consider promoting the benefits of markets and local products during this time.

- Know your farmer – you will see the person(s) who grew or produced your food. You can see they are healthy and feel more comfortable with the foods you are feeding your family.
- Food in a farmers market is not part of the supply chain that serves other food venues. The limited chain means fewer people handled the food and reduced the risk of contamination.
- Farmers markets are outdoor events – fresh air is healthy and so is the food at farmers markets.
- Maintaining a healthy diet of fresh, locally grown foods can increase your overall health. A healthy body is better able to resist and fight disease.
- Promote the efforts the market is taking to minimize the risk to their customers.

The Alabama Department of Agriculture & Industries has worked on a set of guidelines that we believe will be in the best interest of our markets, their farmers and consumers. These are based on the potential risks associated with COVID-19 and its impact on health and the economic well-being of our farmers.

COVID-19-Related Emergency Orders of State Agencies and ADPH News Releases. As this situation evolves, ADPH will provide updates on their COVID-19 web page at: <http://www.alabamapublichealth.gov/infectiousdiseases/2019-coronavirus.html>

KEEP OUR INDUSTRY SAFE

Prevent the spread of COVID-19 in

7 STEPS

- 01 Wash your hands frequently
- 02 Avoid touching your eyes, nose and mouth
- 03 Cover your cough using the bend of your elbow or a tissue
- 04 Avoid crowded places and close contact with anyone that has fever or cough
- 05 Stay at home if you feel unwell
- 06 If you have a fever, cough and difficulty breathing, seek medical care early — but call first
- 07 Get information from trusted sources

POULTRY FARMING IS ESSENTIAL

Farmers are **ESSENTIAL**. There will always be a demand for poultry meat and by products. This is a **POSITIVE** for all producers. This is real-world Essential. While everyone else is trying to figure out their place, farmers know **EXACTLY** what they should be doing to help. Just keep on being the steady provider for the world that they have been since God made a Farmer.

Are you considering joining the poultry industry? We are still showing farms to interested buyers! Please **DO NOT HESITATE** to reach out to us with questions.

WE CAN HELP YOU FIND THE RIGHT FARM FOR YOU!

ROBERT KING

Guidelines for Submitting Classifieds

Following are the guidelines for advertising in the classified section of the Alabama Farmers and Consumers' Bulletin. Adherence to these rules will ensure quick processing of ads. All ads that do not meet the following guidelines will not be published.

1. Only those ads which pertain to agricultural or forestry products and to those items employed in the actual growth, harvesting and disposal of such products will be accepted.
2. Ads should be typed or printed. Those ads that are not legible will not be published.
3. Ads must be limited to 20 words. This does not include name, address or phone number.
4. Ads must include name, address, city, zip code, area code/phone number and county, no "Farm Names or Work Names/Addresses." Only two phone numbers will be listed. Due to the number of character spaces required for most E-mail addresses, a subscriber must select either a resident address or an E-mail address. Both cannot be printed.
5. Only paid subscribers are permitted to advertise in the Bulletin.
6. Paid subscribers can submit more than one advertisement per category per month but each advertisement is still limited to 20 words.
7. Ads for the classified section will not be accepted from dealers, merchants or commercial establishments.
8. Ads received by fax or e-mail must be received by 5 p.m. on the 15th day of the month and ads received by regular mail must be postmarked by 5 p.m. on the 12th day of the month in order to appear in the following month's issue. The e-mail address is gazpub.afcb@gmail.com and the fax number is 334/240-7169.
9. Ads which are to be repeated must be submitted for each issue.
10. Real Property (Land) advertised/wanted must be a minimum of 10 acres or more. Ads will not be accepted from dealers or persons selling land on a commission basis. Information on housing should be limited. Ads should reflect descriptions of land/farm.
11. Only livestock (herding/working) dogs will be published in the Bulletin.
12. Instructional material cannot be advertised in the Bulletin.
13. Ads will be accepted for agricultural work only. Ads for household, nursing or companionship will not be accepted.
14. Ads to exchange one item for another will be accepted only when both items being exchanged relate to agriculture. Ads for cars, boats, mobile homes, etc. will not be accepted as an exchange for agricultural items.
15. Prices must be included with all items offered for sale. Price ranges may be used in certain ads; for example, due to age, weight, etc. cattle can be advertised as \$1,200 - \$1,500.
16. We will only advertise birds listed in the National Poultry Improvement Plan (NPIP) book. Notices from poultry dealers, order buyers or persons selling on commission cannot be accepted. Please note: Psittacine birds and pigeons are NOT listed in the NPIP book. Any questions concerning NPIP should be directed to the Poultry Unit at 334/240-7255, ext 4.

Advertisements in the Bulletin are published on a first-come, first-serve basis. It is to the advertiser's advantage to submit their items as soon as possible. The Bulletin does not assume responsibility for transactions resulting from the use of this publication. Misrepresentations will result in the revocation of all privileges. For questions concerning the guidelines, please e-mail gazpub.afcb@gmail.com.
